

SEMINAR ANNOUNCEMENT

MACHINE GUARDING SOLUTIONS
*A Better & Economical Approach
to Employee Safety*

Precision Electric Motor Works is happy to announce that we will be hosting a special UniGuard™ Machine Guarding Solutions Seminar. The seminar will be presented by Kenny Geoghagan, National Sales Manager for UNIGUARD.

The innovative UniGuard™ Machine Guard is used primarily to enclose a rotating coupling or V-Belt connecting the shafts of the driven equipment and the driver (usually an electric motor) to prevent harm to people working around the equipment. Made from sturdy polyethylene, these guards can be custom designed in any size—small or large – to cover the rotating shafts and drive components. The guards can be customized for users needing access doors for coupling maintenance (such as greasing), or with clear windows for viewing the rotating elements.

The presentation to include the following:

- Machine Guarding Solutions
- Horizontal Belt Guards
- Stock Barrel Type Guards
- Stuffing Box UniClear Goulds
- Stuffing Box UniClear Guards Durco
- Type CGU Kit Guard
- Type GDSA Adjustable Width DD Guards
- Vertical Belt Guards

Join us for a special **SEMINAR and SHOP TOUR on Friday February 15th, 2019 at 10am**. The seminar will be held in our newly opened INDUSTRIAL SHOWROOM. Space is limited. Please RSVP by sending an email to info@precisionmotors.net no later than **Friday, February 1st, 2019** - Lunch will be served.

Hope to see you there!
